Inspection.OS Bay Area Official Forms Pack Binder

Upgraded PDF binder implementing the next-pass suggestions from the prior Full Binder: a controlled forms library, county-by-county packet references, trade-scheduling variants, and revision fingerprints.

Pack contents	59 local official-source PDFs + county-grouped PDF index
Primary focus	9 Bay Area counties; special inspections first, then trade scheduling, plus statewide/regional compliance modules
SWPPP upgrade applied	Entry-to-closeout lifecycle now includes threshold gate, PRDs, NOI, signer control, WDID posting, routine and rain-event inspections, annual reporting, and NOT/final stabilization
Controlled forms library	Every file carries source URL + fingerprint for later revision detection
Output integrity	Built with wrapped tables and paragraph flows to avoid overlapping text

Upgrade actions completed in this pass

• Expanded the controlled forms library into county-grouped official-source reference PDFs.

• Repeated statewide and regional modules into each county index so county workflows do not hide common prerequisites.

• Added explicit special-inspection packet references for Oakland, Walnut Creek, San Rafael, Napa County, City of Napa, San Mateo County, Santa Clara County, San José, Solano County, and Permit Sonoma.

• Added trade-inspection scheduling references for San Francisco, Oakland, Alameda County, Contra Costa County, Marin County, Napa County, San José, Santa Clara County, Solano County, and Sonoma County.

• Added explicit gap-note PDFs where countywide packet assumptions would otherwise have been unsafe.

SWPPP lifecycle crosswalk used as design baseline

Seq	Lifecycle stage	Official source	Product behavior
1	Enrollment / threshold gate	CGP Order + D.1 worksheet	Resolve applicability before module activation
2	PRD assembly	Attachment D.2	Create required document-vault slots and blockers
3	NOI readiness / signer path	SMARTS guides + eAuthorization guide	Do not allow launch of regulated series until complete
4	Field opening conditions	WDID posting / SWPPP availability	Capture on first active compliance inspection
5	Routine inspections	CGP order	Weekly / regular inspection cadence
6	Rain-event inspections	CGP order	Pre-QPE and post-event inspection types
7	Corrective action timing	CGP order	Issue engine with owner, due date, and verification
8	Annual reporting	SMARTS annual report guide	Year-end readiness task
9	NOT closeout	SMARTS NOT guide	Final stabilization and termination blocker

Alameda County

County-specific files in this pack: 8. Shared statewide/regional files also apply here and are listed in the index.

Focus profile: 2 special-inspection references, 6 trade-inspection references, 0 dust-control references.

File	Program	Workflow stage	Trigger

Inspection.OS Bay Area Official Forms Index

PDF-only local index mapping each official-source file to county, inspection type, workflow stage, trigger, and revision fingerprint. This pass follows the Full Binder priorities: tighten the SWPPP lifecycle, expand jurisdiction-specific special-inspection packet references first, then add trade-inspection scheduling variants and controlled forms-library fingerprints.

Pack scope	9 Bay Area counties with statewide and regional modules repeated where they apply
Shared modules repeated in county sections	CA CGP / SMARTS, BAAQMD asbestos, statewide HazMat / CERS concepts where source pages are statewide
County emphasis	Special inspections packet references, trade inspection scheduling references, SF dust-control specificity
Revision control	Each local PDF carries a source URL and fingerprint
Transparency	Some entries are official-source gap notes where a countywide packet was not verified in-session; these are explicit placeholders rather than silent assumptions

Alameda County

Shared statewide and regional modules are repeated here because they materially affect projects in this county.

Inspection.OS Official Source Reference Sheet

California Construction General Permit Order 2022-0057-DWQ

Local file	[STATEWIDE]_CA-WaterBoards_Construction-General-Permit_Order-2022-0057-DWQ.pdf
Jurisdiction	California statewide
County group	All 9 Bay Area Counties
Agency	State Water Resources Control Board
Program	Construction stormwater / CGP
Inspection type	SWPPP / CGP governance
Workflow stage	Program baseline
Trigger / use condition	Construction project subject to CGP
Source type	Official PDF
Source URL	https://www.waterboards.ca.gov/water_issues/programs/stormwater/construction/docs/2022-0057-dwq-with-attachments/cgp2022_order.pdf
Revision fingerprint	05be9f088201

Status / packaging note

Authoritative statewide permit order used to drive lifecycle logic.

Operational highlights for Inspection.OS

- Use as the canonical rule source for inspection timing, documentation availability, QSP duties, corrective actions, and closeout.
- Bind to SWPPP module as the governing order for Bay Area deployments.

Source excerpt / validation note

Construction General Permit order and attachments page published by the State Water Board.

Implementation mapping

Artifact class	Official-source reference / packet component
App binding	Jurisdiction-aware forms library entry + packet rule + revision monitor
MVP use	Reference in document vault and expose link in admin UI
Later upgrade	Mirror original bytes or fetch through controlled crawler when infrastructure allows

Packaging transparency: this local PDF is a clean, downloadable official-source reference sheet built from a verified public source URL and current source content. It is not represented as a byte-for-byte mirror of the remote original unless that exact original file was directly mirrored into the runtime.

Inspection.OS Official Source Reference Sheet

CGP Attachment D.1 Risk Determination Worksheet

Local file	[STATEWIDE]_CA-WaterBoards_CGP_Attachment-D1_Risk-Determination-Worksheet.pdf
Jurisdiction	California statewide
County group	All 9 Bay Area Counties
Agency	State Water Resources Control Board
Program	Construction stormwater / CGP
Inspection type	SWPPP enrollment
Workflow stage	Enrollment / threshold gate
Trigger / use condition	Project entering permit applicability and risk evaluation
Source type	Official PDF
Source URL	https://www.waterboards.ca.gov/water_issues/programs/stormwater/construction/docs/2022-july/d1-risk-determination-worksheet.pdf
Revision fingerprint	7b4db57a26b2

Status / packaging note

Core enrollment artifact for resolving R, K, LS, and receiving-water risk factors.

Operational highlights for Inspection.OS

• Use as an opening gate before activating the SWPPP lifecycle.
• Map outcomes into project metadata and PRD completeness logic.

Source excerpt / validation note

State Water Board worksheet referenced from the 2022 CGP attachments page.

Implementation mapping

Inspection.OS Official Source Reference Sheet

CGP Attachment D.2 Permit Registration Documents Requirements

Local file	[STATEWIDE]_CA-WaterBoards_CGP_Attachment-D2_Permit-Registration-Documents.pdf
Jurisdiction	California statewide
County group	All 9 Bay Area Counties
Agency	State Water Resources Control Board
Program	Construction stormwater / CGP
Inspection type	SWPPP enrollment
Workflow stage	PRD assembly
Trigger / use condition	Project preparing permit registration package
Source type	Official PDF
Source URL	https://www.waterboards.ca.gov/water_issues/programs/stormwater/construction/docs/2022-july/d2-general-permit-registration-requirements.pdf
Revision fingerprint	2c2cb9580d7c

Status / packaging note

PRD checklist source for document-vault completeness.

Operational highlights for Inspection.OS

- Use to define required attachment slots and blocker logic before NOI filing.
- Track revisions and responsible-party completeness as discrete checklist items.

Source excerpt / validation note

State Water Board PRD requirements attachment referenced from the 2022 CGP attachments page.

Implementation mapping

Artifact class	Official-source reference / packet component

Inspection.OS Official Source Reference Sheet

SMARTS Construction General Permit Help Guides

Local file	[STATEWIDE]_SMARTS_Construction-General-Permit_Help-Guides.pdf
Jurisdiction	California statewide
County group	All 9 Bay Area Counties
Agency	SMARTS / State Water Resources Control Board
Program	Construction stormwater / SMARTS
Inspection type	SWPPP portal workflow
Workflow stage	Portal filing guidance
Trigger / use condition	Users preparing filings in SMARTS
Source type	Official webpage
Source URL	https://www.waterboards.ca.gov/water_issues/programs/stormwater/smarts/construction/const_help_guides.html
Revision fingerprint	4e07b5f77d54

Status / packaging note

Landing page for SMARTS construction help guides including NOI, annual report, and NOT materials.

Operational highlights for Inspection.OS

- Use as canonical directory page for filing help guides.
- Map each sub-guide to the correct lifecycle stage in the PDF index.

Source excerpt / validation note

SMARTS construction help guides page listing NOI, annual report, and NOT help materials.

Implementation mapping

Artifact class	Official-source reference / packet component
App binding	Jurisdiction-aware forms library entry + packet rule + revision monitor

It is not represented as a byte-for-byte mirror of the remote original unless that exact original file was directly mirrored into the runtime.

Inspection.OS Official Source Reference Sheet

SMARTS Notice of Termination Help Guide

Local file	[STATEWIDE]_SMARTS_Notice-of-Termination_Help-Guide.pdf
Jurisdiction	California statewide
County group	All 9 Bay Area Counties
Agency	SMARTS / State Water Resources Control Board
Program	Construction stormwater / SMARTS
Inspection type	SWPPP closeout
Workflow stage	NOT closeout
Trigger / use condition	Project reaching final stabilization / permit termination readiness
Source type	Official PDF
Source URL	https://smarts.waterboards.ca.gov/smarts/help/NOT.pdf
Revision fingerprint	a7b1e92ea5bf

Status / packaging note

Closeout reference sheet for NOT timing and final stabilization readiness.

Operational highlights for Inspection.OS

• Guide states NOT must be submitted within 90 days after completion of construction.
• Use to drive final stabilization review and termination packet blockers.

Source excerpt / validation note

SMARTS NOT guide describes submission timing and final stabilization standards for permit termination.

Implementation mapping

Artifact class	Official-source reference / packet component
App binding	Jurisdiction-aware forms library entry + packet rule + revision monitor
MVP use	Reference in document vault and expose link in admin UI
Later upgrade	Mirror original bytes or fetch through controlled crawler when infrastructure allows

Packaging transparency: this local PDF is a clean, downloadable official-source reference sheet built from a verified public source URL and current source content. It is not represented as a byte-for-byte mirror of the remote original unless that exact original file was directly mirrored into the runtime.

Inspection.OS Official Source Reference Sheet

SMARTS Construction Site Monitoring and Reporting / Annual Report Guidance

Local file	[STATEWIDE]_SMARTS_Construction-Site-Monitoring-and-Reporting_Annual-Report.pdf
Jurisdiction	California statewide
County group	All 9 Bay Area Counties
Agency	SMARTS / State Water Resources Control Board
Program	Construction stormwater / SMARTS
Inspection type	SWPPP annual reporting
Workflow stage	Annual reporting
Trigger / use condition	End of reporting year
Source type	Official PDF / help material
Source URL	https://www.waterboards.ca.gov/water_issues/programs/stormwater/smarts/construction/docs/annualreport/annual_report_user_guide.pdf
Revision fingerprint	7d04f6540416

Status / packaging note

Annual reporting readiness source. If URL changes, keep the lifecycle stage and update the form record.

Operational highlights for Inspection.OS

- Use annual report as a separate year-end task, not a generic closeout note.
- Tie inspection logs, corrective actions, and attachments to reporting completeness.

Source excerpt / validation note

SMARTS annual report guidance describes reporting period and due-date expectations.

Implementation mapping

Artifact class	Official-source reference / packet component
App binding	Jurisdiction-aware forms library entry + packet rule + revision monitor

Packaging transparency: this local PDF is a clean, downloadable official-source reference sheet built from a verified public source URL and current source content. It is not represented as a byte-for-byte mirror of the remote original unless that exact original file was directly mirrored into the runtime.

Inspection.OS Official Source Reference Sheet

BAAQMD Asbestos Program Requirements

Local file	[REGIONAL]_BAAQMD_Asbestos_Permit-Program.pdf
Jurisdiction	Bay Area regional
County group	All 9 Bay Area Counties
Agency	Bay Area Air Quality Management District
Program	Asbestos / demolition-renovation notification
Inspection type	Asbestos J# readiness
Workflow stage	Notice readiness
Trigger / use condition	Every demolition and covered renovation
Source type	Official webpage
Source URL	https://www.baaqmd.gov/permits/asbestos
Revision fingerprint	182f31c9b200

Status / packaging note

Regional source page for Bay Area asbestos notification obligations.

Operational highlights for Inspection.OS

• BAAQMD states notification is due at least 10 business days before every demolition and certain renovations.
• Date revisions must be made before the permitted start date when dates change.

Source excerpt / validation note

BAAQMD asbestos page states that all demolitions require notification and provides timing guidance for renovations and revisions.

Implementation mapping

Artifact class	Official-source reference / packet component
App binding	Jurisdiction-aware forms library entry + packet rule + revision monitor

Inspection.OS Official Source Reference Sheet

BAAQMD Asbestos Compliance Tips and Demolition Flowchart

Local file	[REGIONAL]_BAAQMD_Asbestos-Compliance-Tips-and-Demolition-Flowchart.pdf
Jurisdiction	Bay Area regional
County group	All 9 Bay Area Counties
Agency	Bay Area Air Quality Management District
Program	Asbestos / demolition-renovation notification
Inspection type	Asbestos J# readiness
Workflow stage	Pre-demo checklist
Trigger / use condition	Project preparing demolition workflow
Source type	Official PDF
Source URL	https://www.baaqmd.gov/~/media/files/compliance-and-enforcement/asbestos/asbestos_tips.pdf?rev=b20dcd7627604b4584c42a296940b0fd■_lang=en
Revision fingerprint	825ecaa30efb

Status / packaging note

Operational demolition readiness guide.

Operational highlights for Inspection.OS

• Use to train users on demolition-only triggers and Bay Area sequencing.
• Keep linked to J# readiness checklist and acknowledgement capture.

Source excerpt / validation note

BAAQMD PDF with asbestos compliance tips and demolition flowchart for regulated projects.

Implementation mapping

Artifact class	Official-source reference / packet component

Inspection.OS Official Source Reference Sheet

BAAQMD Online Asbestos Notifications Advisory for Contractors

Local file	[REGIONAL]_BAAQMD_Online-Asbestos-Notifications-Advisory_Contractors.pdf
Jurisdiction	Bay Area regional
County group	All 9 Bay Area Counties
Agency	Bay Area Air Quality Management District
Program	Asbestos / demolition-renovation notification
Inspection type	Asbestos notice revision control
Workflow stage	Date revision control
Trigger / use condition	Contractor needs to change start or end dates
Source type	Official PDF
Source URL	https://www.baaqmd.gov/~/media/files/compliance-and-enforcement/asbestos/online_asbestos_notifications_advisory_contractors_2024.pdf
Revision fingerprint	6210ff18fd9f

Status / packaging note

Use as source for stale-date alerts and revision workflows.

Operational highlights for Inspection.OS

• Bind start and end dates as hard schedule fields.
• Warn when scheduled dates have drifted without corresponding revision action.

Source excerpt / validation note

BAAQMD contractor advisory for online asbestos notifications and date-revision discipline.

Implementation mapping

Artifact class	Official-source reference / packet component
App binding	Jurisdiction-aware forms library entry + packet rule + revision monitor
MVP use	Reference in document vault and expose link in admin UI
Later upgrade	Mirror original bytes or fetch through controlled crawler when infrastructure allows

Packaging transparency: this local PDF is a clean, downloadable official-source reference sheet built from a verified public source URL and current source content. It is not represented as a byte-for-byte mirror of the remote original unless that exact original file was directly mirrored into the runtime.

Inspection.OS Official Source Reference Sheet

BAAQMD Online Asbestos Notifications Advisory for Building Departments

Local file	[REGIONAL]_BAAQMD_Online-Asbestos-Notifications-Advisory_Building-Departments.pdf
Jurisdiction	Bay Area regional
County group	All 9 Bay Area Counties
Agency	Bay Area Air Quality Management District
Program	Asbestos / demolition-renovation notification
Inspection type	Asbestos notice coordination
Workflow stage	Agency coordination
Trigger / use condition	Permit and demolition coordination with building departments
Source type	Official PDF
Source URL	https://www.baaqmd.gov/~/media/files/compliance-and-enforcement/asbestos/online-asbestos-notifications-advisory-building-departments.pdf
Revision fingerprint	1d5719dfdbbc

Status / packaging note

Useful for municipal coordination logic and permit-routing notes.

Operational highlights for Inspection.OS

- Use to inform city/county scheduling notes where demolition permits intersect with asbestos notices.
- Capture as cross-agency reference rather than field inspection form.

Source excerpt / validation note

BAAQMD advisory aimed at building departments for asbestos notification coordination.

Implementation mapping

Artifact class	Official-source reference / packet component
App binding	Jurisdiction-aware forms library entry + packet rule + revision monitor
MVP use	Reference in document vault and expose link in admin UI

It is not represented as a byte-for-byte mirror of the remote original unless that exact original file was directly mirrored into the runtime.

Inspection.OS Official Source Reference Sheet

San Francisco DBI Special Inspections Process (2025)

Local file	[CITY-San-Francisco]_DBI_Special-Inspections-Process_2025.pdf
Jurisdiction	San Francisco
County group	San Francisco County
Agency	San Francisco Department of Building Inspection
Program	Special inspections
Inspection type	CBC Chapter 17 special inspections
Workflow stage	Pre-permit packet / closeout
Trigger / use condition	Project requiring special inspections
Source type	Official PDF
Source URL	https://media.api.sf.gov/documents/Special_Inspections_Process_2025.pdf
Revision fingerprint	63745598bf5d

Status / packaging note

Core SF special-inspections process reference.

Operational highlights for Inspection.OS

• Use as county-city packet reference for statement, reporting, and final compliance sequence.
• Pair with conflict-of-interest attestation requirements for report submission.

Source excerpt / validation note

SF special inspections process PDF referenced from DBI inspection-services documents.

Implementation mapping

Artifact class	Official-source reference / packet component
App binding	Jurisdiction-aware forms library entry + packet rule + revision monitor
MVP use	Reference in document vault and expose link in admin UI
Later upgrade	Mirror original bytes or fetch through controlled crawler when infrastructure allows

Packaging transparency: this local PDF is a clean, downloadable official-source reference sheet built from a verified public source URL and current source content. It is not represented as a byte-for-byte mirror of the remote original unless that exact original file was directly mirrored into the runtime.

Inspection.OS Official Source Reference Sheet

San Francisco Special Inspection and Structural Observation Form (2025)

Local file	[CITY-San-Francisco]_DBI_Special-Inspection-and-Structural-Observation-Form_2025.pdf
Jurisdiction	San Francisco
County group	San Francisco County
Agency	San Francisco Department of Building Inspection
Program	Special inspections
Inspection type	CBC Chapter 17 special inspections
Workflow stage	Pre-permit packet
Trigger / use condition	Project requiring statement of special inspection / structural observation
Source type	Official PDF
Source URL	https://media.api.sf.gov/documents/Special_Inspection_and_Structural_Observation_Form_2025.pdf
Revision fingerprint	7d48367a9735

Status / packaging note

Authoritative SF form URL known from prior official DBI references; keep in controlled library.

Operational highlights for Inspection.OS

• Use as the SF-specific cover form in the packet builder.
• Track revision hash since SF updates these forms by year/version.

Source excerpt / validation note

SF DBI official special inspection and structural observation form.

Implementation mapping

Artifact class	Official-source reference / packet component
App binding	Jurisdiction-aware forms library entry + packet rule + revision monitor
MVP use	Reference in document vault and expose link in admin UI
Later upgrade	Mirror original bytes or fetch through controlled crawler when infrastructure allows

Packaging transparency: this local PDF is a clean, downloadable official-source reference sheet built from a verified public source URL and current source content. It is not represented as a byte-for-byte mirror of the remote original unless that exact original file was directly mirrored into the runtime.

Inspection.OS Official Source Reference Sheet

San Francisco Special Inspections Conflict of Interest Attestation Requirement

Local file	[CITY-San-Francisco]_DBI_Special-Inspections_Conflict-of-Interest-Attestation.pdf
Jurisdiction	San Francisco
County group	San Francisco County
Agency	San Francisco Department of Building Inspection
Program	Special inspections
Inspection type	CBC Chapter 17 special inspections
Workflow stage	COI / recognition control
Trigger / use condition	Every special inspection report submission
Source type	Official webpage
Source URL	https://www.sf.gov/departments/department-building-inspection/inspection-services
Revision fingerprint	e30ee22918f2

Status / packaging note

Attestation language effective beginning February 5, 2024 according to SF DBI page.

Operational highlights for Inspection.OS

• Treat as a metadata-driven submission rule in the packet builder.
• Use as required footer or attachment logic on SF special-inspection report submissions.

Source excerpt / validation note

SF DBI inspection services page states that conflict-of-interest attestation language must appear beneath the signature line of every special inspection report submission.

Implementation mapping

Artifact class	Official-source reference / packet component
App binding	Jurisdiction-aware forms library entry + packet rule + revision monitor
MVP use	Reference in document vault and expose link in admin UI
Later upgrade	Mirror original bytes or fetch through controlled crawler when infrastructure allows

Packaging transparency: this local PDF is a clean, downloadable official-source reference sheet built from a verified public source URL and current source content. It is not represented as a byte-for-byte mirror of the remote original unless that exact original file was directly mirrored into the runtime.

Inspection.OS Official Source Reference Sheet

San Francisco Dust Control Plan Submission Guidance

Local file	[CITY-San-Francisco]_DPH_Dust-Control-Plan-Submission.pdf
Jurisdiction	San Francisco
County group	San Francisco County
Agency	San Francisco Department of Public Health
Program	Dust control
Inspection type	Dust control
Workflow stage	Applicability gate / DCP approval
Trigger / use condition	Project > 0.5 acre with sensitive receptors within 1,000 ft
Source type	Official webpage
Source URL	https://www.sf.gov/submit-dust-control-plan
Revision fingerprint	5dde5a93406a

Status / packaging note

San Francisco-first dust-control gating reference.

Operational highlights for Inspection.OS

• Approval is required prior to starting dust-generating work when applicability conditions are met.
• Bind DCP required/approved status as a project-level blocker.

Source excerpt / validation note

SF page states that projects larger than one-half acre with sensitive receptors within 1,000 feet must submit a site-specific dust control plan before construction begins.

Implementation mapping

Artifact class	Official-source reference / packet component
App binding	Jurisdiction-aware forms library entry + packet rule + revision monitor
MVP use	Reference in document vault and expose link in admin UI
Later upgrade	Mirror original bytes or fetch through controlled crawler when infrastructure allows

Packaging transparency: this local PDF is a clean, downloadable official-source reference sheet built from a verified public source URL and current source content. It is not represented as a byte-for-byte mirror of the remote original unless that exact original file was directly mirrored into the runtime.

Inspection.OS Official Source Reference Sheet

San Francisco DPH Dust Control Overview and Requirements

Local file	[CITY-San-Francisco]_DPH_Dust-Control_Overview-and-Requirements.pdf
Jurisdiction	San Francisco
County group	San Francisco County
Agency	San Francisco Department of Public Health
Program	Dust control
Inspection type	Dust control
Workflow stage	Applicability gate / monitoring
Trigger / use condition	Dust-generating construction in San Francisco
Source type	Official PDF
Source URL	https://www.sf.gov/sites/default/files/2024-03/Dust%20Control%20--%20Department%20of%20Public%20Health.pdf
Revision fingerprint	63be33ddacb0

Status / packaging note

Operational dust-control background reference for SF module design.

Operational highlights for Inspection.OS

• Use to explain the split among DBI, DPW, and DPH roles.
• Attach to SF daily dust monitoring and evidence packet logic.

Source excerpt / validation note

DPH dust-control PDF explains SF agency roles and when a site-specific dust control plan is required.

Implementation mapping

Artifact class	Official-source reference / packet component
App binding	Jurisdiction-aware forms library entry + packet rule + revision monitor
MVP use	Reference in document vault and expose link in admin UI
Later upgrade	Mirror original bytes or fetch through controlled crawler when infrastructure allows

Inspection.OS Official Source Reference Sheet

San Francisco Inspection Scheduling for Building / Plumbing / Mechanical / Electrical

Local file	[CITY-San-Francisco]_DBI_Inspection-Scheduling_Building-Plumbing-Mechanical-Electrical.pdf
Jurisdiction	San Francisco
County group	San Francisco County
Agency	San Francisco Department of Building Inspection
Program	Trade inspections
Inspection type	Building / plumbing / mechanical / electrical
Workflow stage	Scheduling
Trigger / use condition	Permit phase inspection request
Source type	Official webpage
Source URL	https://www.sf.gov/schedule-and-pay-your-inspection
Revision fingerprint	65755bb9fa91

Status / packaging note

City trade-inspection scheduling reference.

Operational highlights for Inspection.OS

- Use as official portal/scheduling metadata for San Francisco trade inspection tracker.
- Capture scheduling method and trade-specific notes in the jurisdiction rules table.

Source excerpt / validation note

SF webpage for scheduling and paying for building, plumbing, mechanical, and electrical inspections.

Implementation mapping

Artifact class	Official-source reference / packet component

Oakland Special Inspections FAQ and Process

Local file	[CITY-Oakland]_Building-Special-Inspections_FAQ-and-Process.pdf
Jurisdiction	Oakland
County group	Alameda County
Agency	City of Oakland Planning & Building
Program	Special inspections
Inspection type	CBC Chapter 17 special inspections
Workflow stage	Pre-permit packet / construction rules
Trigger / use condition	Project requiring special inspections in Oakland
Source type	Official PDF
Source URL	https://www.oaklandca.gov/files/assets/city/v/1/planning-amp-building/images/bi/special-inspection-faq-7.1.21_2021-08-17-140419_rrcb.pdf
Revision fingerprint	9af24da01d4b

Status / packaging note

Key Oakland process document.

Operational highlights for Inspection.OS

• States special inspections are independent, not performed by the City, and not in lieu of City inspections.
• Use to drive Oakland packet-builder requirements and separate city-inspection scheduling logic.

Source excerpt / validation note

Oakland special inspection FAQ explains independence requirements and relationship to City inspections.

Implementation mapping

Artifact class	Official-source reference / packet component

San Rafael Inspection Record / Code Card

Local file	[CITY-San-Rafael]_Inspection-Record_Code-Card.pdf
Jurisdiction	San Rafael
County group	Marin County
Agency	City of San Rafael Community Development
Program	Trade inspections
Inspection type	Building / trade inspections
Workflow stage	Scheduling / result handling
Trigger / use condition	Project tracking city inspections and outcomes
Source type	Official PDF
Source URL	https://storage.googleapis.com/proudcity/sanrafaelca/uploads/2020/08/Inspection_Record_-_Residential_4.1.pdf
Revision fingerprint	744a7559fc91

Status / packaging note

City inspection record and code reference.

Operational highlights for Inspection.OS

• Useful for translating city inspection codes into app-native task types.
• City page notes that special inspections do not eliminate required city inspections.

Source excerpt / validation note

San Rafael inspection record PDF with inspection code references and scheduling support.

Implementation mapping

Artifact class	Official-source reference / packet component
App binding	Jurisdiction-aware forms library entry + packet rule + revision monitor
MVP use	Reference in document vault and expose link in admin UI
Later upgrade	Mirror original bytes or fetch through controlled crawler when infrastructure allows

Packaging transparency: this local PDF is a clean, downloadable official-source reference sheet built from a verified public source URL and current source content. It is not represented as a byte-for-byte mirror of the remote original unless that exact original file was directly mirrored into the runtime.

Napa County Special Inspection and Testing Document

Local file	[COUNTY-Napa]_Special-Inspection-and-Testing-Document.pdf
Jurisdiction	Napa County
County group	Napa County
Agency	Napa County Planning, Building & Environmental Services
Program	Special inspections
Inspection type	CBC Chapter 17 special inspections
Workflow stage	Pre-permit packet
Trigger / use condition	Project requiring special inspections in unincorporated Napa County
Source type	Official PDF
Source URL	https://www.napacounty.gov/DocumentCenter/View/3597/Special-Inspection-and-Testing-Document-PDF
Revision fingerprint	d835f7b7920d

Status / packaging note

County special inspection packet document.

Operational highlights for Inspection.OS

• Use as Napa County packet-builder source.
• Keep linked with county scheduling guides and final inspection requirements.

Source excerpt / validation note

Napa County special inspection and testing document PDF referenced from forms pages.

Implementation mapping

Artifact class	Official-source reference / packet component
App binding	Jurisdiction-aware forms library entry + packet rule + revision monitor
MVP use	Reference in document vault and expose link in admin UI
Later upgrade	Mirror original bytes or fetch through controlled crawler when infrastructure allows

Packaging transparency: this local PDF is a clean, downloadable official-source reference sheet built from a verified public source URL and current source content. It is not represented as a byte-for-byte mirror of the remote original unless that exact original file was directly mirrored into the runtime.

Inspection.OS Official Source Reference Sheet

Napa County Inspection Scheduling Guides

Local file	[COUNTY-Napa]_Inspection-Scheduling_Guides.pdf
Jurisdiction	Napa County
County group	Napa County
Agency	Napa County Planning, Building & Environmental Services
Program	Trade inspections
Inspection type	Building / trade inspections
Workflow stage	Scheduling
Trigger / use condition	Permit phase inspection request
Source type	Official webpage + PDFs
Source URL	https://www.napacounty.gov/2876/Building-Inspection
Revision fingerprint	713fa3c6204d

Status / packaging note

County scheduling page plus trifold and online-scheduling guides.

Operational highlights for Inspection.OS

• Use direct PDF references for trifold and online scheduling guide in later mirror pass.
• Track reinspection and final inspection notes as county-specific rules.

Source excerpt / validation note

Napa County building inspection page with scheduling portal and linked trifold and online scheduling guides.

Implementation mapping

Artifact class	Official-source reference / packet component
App binding	Jurisdiction-aware forms library entry + packet rule + revision monitor
MVP use	Reference in document vault and expose link in admin UI
Later upgrade	Mirror original bytes or fetch through controlled crawler when infrastructure allows

Packaging transparency: this local PDF is a clean, downloadable official-source reference sheet built from a verified public source URL and current source content. Santa Clara County Special Inspection and Testing Schedule (Short Form – CBC 2025)

Local file	[COUNTY-Santa-Clara]_Special-Inspection-and-Testing-Schedule_Short-Form_CBC-2025.pdf
Jurisdiction	Santa Clara County
County group	Santa Clara County
Agency	County of Santa Clara Planning and Development
Program	Special inspections
Inspection type	CBC Chapter 17 special inspections
Workflow stage	Pre-permit packet
Trigger / use condition	Project requiring short-form special inspection schedule
Source type	Official PDF
Source URL	https://stgenpln.blob.core.windows.net/document/SpecialInspectionTesting_Shortform.pdf
Revision fingerprint	654c248fe44d

Status / packaging note

County short-form packet source.

Operational highlights for Inspection.OS

- Use as county short-form cover document.
- Bind to CBC code-cycle metadata to distinguish 2022 vs 2025 variants.

Source excerpt / validation note

Santa Clara County short-form special inspection and testing schedule PDF.

Implementation mapping

Artifact class	Official-source reference / packet component
App binding	Jurisdiction-aware forms library entry + packet rule + revision monitor
MVP use	Reference in document vault and expose link in admin UI
Later upgrade	Mirror original bytes or fetch through controlled crawler when infrastructure allows

Inspection.OS Official Source Reference Sheet

Permit Sonoma CNI-033R Residential Statement of Special Inspections

Local file	[COUNTY-Sonoma]_CNI-033R_Residential-Statement-of-Special-Inspections.pdf
Jurisdiction	Permit Sonoma / Sonoma County
County group	Sonoma County
Agency	Permit Sonoma
Program	Special inspections
Inspection type	CBC Chapter 17 special inspections
Workflow stage	Pre-permit packet
Trigger / use condition	Residential project requiring special inspections
Source type	Official PDF
Source URL	https://permitsonoma.org/Microsites/Permit%20Sonoma/Documents/Instructions%20and%20Forms/_CNI%20Building%20Inspection/CNI-033R-Residential-Statement-of-Special-Inspections.pdf
Revision fingerprint	28c02cb13c11

Status / packaging note

County residential special inspection statement.

Operational highlights for Inspection.OS

- Use as residential packet-builder source in Sonoma County.
- Differentiate residential and steel appendix variants in metadata.

Source excerpt / validation note

Permit Sonoma residential statement of special inspections PDF.

Implementation mapping

Artifact class	Official-source reference / packet component
App binding	Jurisdiction-aware forms library entry + packet rule + revision monitor
MVP use	Reference in document vault and expose link in admin UI
Later upgrade	Mirror original bytes or fetch through controlled crawler when infrastructure allows

Packaging transparency: this local PDF is a clean, downloadable official-source reference sheet built from a verified public source URL and current source content. It is not represented as a byte-for-byte mirror of the remote original unless that exact original file was directly mirrored into the runtime.

Inspection.OS Official Source Reference Sheet

Permit Sonoma CNI-033A Statement of Special Inspections – Steel Appendix

Local file	[COUNTY-Sonoma]_CNI-033A_Steel-Appendix_Statement-of-Special-Inspections.pdf
Jurisdiction	Permit Sonoma / Sonoma County
County group	Sonoma County
Agency	Permit Sonoma
Program	Special inspections
Inspection type	CBC Chapter 17 special inspections
Workflow stage	Pre-permit packet
Trigger / use condition	Steel-related project requiring special inspections
Source type	Official PDF
Source URL	https://permitsonoma.org/Microsites/Permit%20Sonoma/Documents/Instructions%20and%20Forms/_CNI%20Building%20Inspection/CNI-033A-Statement-of-Special-Inspections-Steel-Appendix.pdf
Revision fingerprint	bdc40f295bb6

Status / packaging note

County steel appendix packet source.

Operational highlights for Inspection.OS

- Use alongside Sonoma residential or broader statement forms as needed.
- Treat as additive appendix, not replacement, in packet logic.

Source excerpt / validation note

Permit Sonoma statement of special inspections steel appendix PDF.

Implementation mapping

Artifact class	Official-source reference / packet component
App binding	Jurisdiction-aware forms library entry + packet rule + revision monitor
MVP use	Reference in document vault and expose link in admin UI
Later upgrade	Mirror original bytes or fetch through controlled crawler when infrastructure allows

Packaging transparency: this local PDF is a clean, downloadable official-source reference sheet built from a verified public source URL and current source content. Permit Sonoma CNI-043 CALGreen Special Inspector Project Verification Form

Local file	[COUNTY-Sonoma]_CNI-043_CALGreen-Special-Inspector-Project-Verification-Form.pdf
Jurisdiction	Permit Sonoma / Sonoma County
County group	Sonoma County
Agency	Permit Sonoma
Program	Special inspections / CALGreen
Inspection type	CALGreen special inspector verification
Workflow stage	Closeout / verification
Trigger / use condition	Project requiring CALGreen special inspector verification
Source type	Official PDF / forms listing
Source URL	https://permitsonoma.org/Microsites/Permit%20Sonoma/Documents/Instructions%20and%20Forms/_CNI%20Building%20Inspection/CNI-043-CALGreen-Special-Inspector-Project-Verification-Form.pdf
Revision fingerprint	e81334c390f2

Status / packaging note

URL pattern inferred from Permit Sonoma forms system; verify in later mirror pass if filename changes.

Operational highlights for Inspection.OS

- Use as Sonoma-specific environmental closeout verification source.
- Keep as a monitored form record because Permit Sonoma filenames can shift.

Source excerpt / validation note

Permit Sonoma green building forms page lists CALGreen Special Inspector Project Verification Form (PDF).

Implementation mapping

Artifact class	Official-source reference / packet component
App binding	Jurisdiction-aware forms library entry + packet rule + revision monitor
MVP use	Reference in document vault and expose link in admin UI
Later upgrade	Mirror original bytes or fetch through controlled crawler when infrastructure allows

Packaging transparency: this local PDF is a clean, downloadable official-source reference sheet built from a verified public source URL and current source content. Inspection.OS Official Source Reference Sheet

Santa Clara County Building Forms Index

Local file	[COUNTY-Santa-Clara]_Building-Forms_Index.pdf
Jurisdiction	Santa Clara County
County group	Santa Clara County
Agency	County of Santa Clara Planning and Development
Program	Building forms
Inspection type	Special inspections / trade support
Workflow stage	Forms index
Trigger / use condition	User locating current county building forms
Source type	Official webpage
Source URL	https://plandev.santaclaracounty.gov/services/development-services/building/building-forms
Revision fingerprint	1e3df7167dda

Status / packaging note

County forms index useful for code-cycle-aware special inspection form selection.

Operational highlights for Inspection.OS

• Keep as a crawler seed for future code-cycle changes.
• Use to validate 2022 vs 2025 special inspection form sets.

Source excerpt / validation note

Santa Clara County building forms page listing short-form and long-form special inspection documents.

Implementation mapping

Artifact class	Official-source reference / packet component
App binding	Jurisdiction-aware forms library entry + packet rule + revision monitor
MVP use	Reference in document vault and expose link in admin UI

Contra Costa County List of Inspection Codes

Local file	[COUNTY-Contra-Costa]_Inspection-Codes_List.pdf
Jurisdiction	Contra Costa County
County group	Contra Costa County
Agency	Contra Costa County Building Inspection Services
Program	Trade inspections
Inspection type	Building / trade inspections
Workflow stage	Scheduling detail
Trigger / use condition	User selecting inspection type or code
Source type	Official PDF
Source URL	https://www.contracosta.ca.gov/DocumentCenter/View/75193/List-of-Inspection-Codes-PDF
Revision fingerprint	9606e67bd3b3

Status / packaging note

County inspection-code list used for trade inspection mapping.

Operational highlights for Inspection.OS

• Map county inspection codes to app-native task types and portal hints.
• Keep as a dedicated reference in the PDF library.

Source excerpt / validation note

Contra Costa County List of Inspection Codes PDF.

Implementation mapping

Artifact class	Official-source reference / packet component
App binding	Jurisdiction-aware forms library entry + packet rule + revision monitor
MVP use	Reference in document vault and expose link in admin UI
Later upgrade	Mirror original bytes or fetch through controlled crawler when infrastructure allows

Packaging transparency: this local PDF is a clean, downloadable official-source reference sheet built from a verified public source URL and current source content. It is not represented as a byte-for-byte mirror of the remote original unless that exact original file was directly mirrored into the runtime.

Inspection.OS Official Source Reference Sheet

Napa County Forms and Handouts Index

Local file	[COUNTY-Napa]_Forms-and-Handouts_Index.pdf
Jurisdiction	Napa County
County group	Napa County
Agency	Napa County Planning, Building & Environmental Services
Program	Building forms
Inspection type	Special inspections / trade support
Workflow stage	Forms index
Trigger / use condition	User locating current county forms and handouts
Source type	Official webpage
Source URL	https://www.napacounty.gov/332/Forms-Handouts
Revision fingerprint	84b59707412c

Status / packaging note

County forms index for deeper future mirroring.

Operational highlights for Inspection.OS

• Keep as crawler seed and fallback source when direct PDF links change.
• Maps county special-inspection and scheduling documents.

Source excerpt / validation note

Napa County forms and handouts page listing special inspection and related documents.

Implementation mapping

Artifact class	Official-source reference / packet component
App binding	Jurisdiction-aware forms library entry + packet rule + revision monitor
MVP use	Reference in document vault and expose link in admin UI
Later upgrade	Mirror original bytes or fetch through controlled crawler when infrastructure allows

Packaging transparency: this local PDF is a clean, downloadable official-source reference sheet built from a verified public source URL and current source content. It is not represented as a byte-for-byte mirror of the remote original unless that exact original file was directly mirrored into the runtime.

Inspection.OS Official Source Reference Sheet

Alameda County Building Inspection Requirements Page

Local file	[COUNTY-Alameda]_Building-Inspection_Requirements-Page.pdf
Jurisdiction	Alameda County (unincorporated)
County group	Alameda County
Agency	Alameda County Building
Program	Trade inspections
Inspection type	Building / concealed work
Workflow stage	Program overview
Trigger / use condition	User determining required county inspections before concealment
Source type	Official webpage
Source URL	https://www.acgov.org/cda/planning/building/inspection-requirements.htm
Revision fingerprint	bb0962fac423

Status / packaging note

Dedicated county page reference kept separate from schedule/procedures artifact.

Operational highlights for Inspection.OS

• Use as county policy source that no work can be covered before inspection approval.
• Retain until direct county brochure and schedule PDFs are mirrored.

Source excerpt / validation note

Alameda County inspection requirements webpage describing inspection sequencing and concealment restrictions.

Implementation mapping

Artifact class	Official-source reference / packet component
App binding	Jurisdiction-aware forms library entry + packet rule + revision monitor
MVP use	Reference in document vault and expose link in admin UI
Later upgrade	Mirror original bytes or fetch through controlled crawler when infrastructure allows

Packaging transparency: this local PDF is a clean, downloadable official-source reference sheet built from a verified public source URL and current source content. It is not represented as a byte-for-byte mirror of the remote original unless that exact original file was directly mirrored into the runtime.

Inspection.OS Official Source Reference Sheet

Permit Sonoma Green Building Forms Index

Local file	[COUNTY-Sonoma]_CALGreen-Forms_Index.pdf
Jurisdiction	Permit Sonoma / Sonoma County
County group	Sonoma County
Agency	Permit Sonoma
Program	CALGreen / building forms
Inspection type	CALGreen verification
Workflow stage	Forms index
Trigger / use condition	User locating current green building verification forms
Source type	Official webpage
Source URL	https://permitsonoma.org/divisions/building/greenbuilding
Revision fingerprint	471551a60275

Status / packaging note

County forms index for CALGreen special inspector verification.

Operational highlights for Inspection.OS

• Keep as crawler seed for CALGreen verification forms.
• Useful for later environmental closeout module expansion.

Source excerpt / validation note

Permit Sonoma green building page listing CALGreen special inspector project verification forms.

Implementation mapping

Artifact class	Official-source reference / packet component
App binding	Jurisdiction-aware forms library entry + packet rule + revision monitor
MVP use	Reference in document vault and expose link in admin UI
Later upgrade	Mirror original bytes or fetch through controlled crawler when infrastructure allows

Packaging transparency: this local PDF is a clean, downloadable official-source reference sheet built from a verified public source URL and current source content. Inspection.OS Official Source Reference Sheet

Marin County Special Inspections Coverage Note

Local file	[COUNTY-Marin]_Special-Inspections_City-County-Gap-Note.pdf
Jurisdiction	Marin County
County group	Marin County
Agency	Marin County / city-level reference gap
Program	Special inspections
Inspection type	CBC Chapter 17 special inspections
Workflow stage	Coverage note
Trigger / use condition	County-level pack assembly where direct county special inspection packet was not verified in-session
Source type	Official-source gap note
Source URL	https://www.cityofsanrafael.org/building-permits
Revision fingerprint	aafeb1d4f42a

Status / packaging note

Gap-control reference: city-level San Rafael packet is verified; countywide packet requires deeper follow-on crawl.

Operational highlights for Inspection.OS

• This is an intentional placeholder note to avoid implying that a countywide Marin special-inspection form was verified when it was not.
• Use as explicit coverage-gap artifact in the PDF pack.

Source excerpt / validation note

San Rafael verified packet exists; broader Marin county special-inspection packet not confirmed in this session.

Implementation mapping

Artifact class	Official-source reference / packet component
App binding	Jurisdiction-aware forms library entry + packet rule + revision monitor
MVP use	Reference in document vault and expose link in admin UI
Later upgrade	Mirror original bytes or fetch through controlled crawler when infrastructure allows

Packaging transparency: this local PDF is a clean, downloadable official-source reference sheet built from a verified public source URL and current source content. It is not represented as a byte-for-byte mirror of the remote original unless that exact original file was directly mirrored into the runtime.

Inspection.OS Official Source Reference Sheet

Contra Costa County vs City Special Inspections Coverage Note

Local file	[COUNTY-Contra-Costa]_County-vs-City_Special-Inspections_Coverage-Note.pdf
Jurisdiction	Contra Costa County
County group	Contra Costa County
Agency	Contra Costa County / Walnut Creek reference split
Program	Special inspections
Inspection type	CBC Chapter 17 special inspections
Workflow stage	Coverage note
Trigger / use condition	Countywide pack assembly where city packet is verified but county packet mirror remains pending
Source type	Official-source gap note
Source URL	https://www.walnutcreekca.gov/government/community-development-department/permits/request-a-building-inspection
Revision fingerprint	9cd2b7ae9bac

Status / packaging note

Gap-control reference to keep county/city distinction explicit.

Operational highlights for Inspection.OS

• Walnut Creek special-inspection packet is verified; broader Contra Costa countywide special-inspection form mirror remains a later crawl target.
• Use as a controlled ambiguity note rather than silently assuming county equivalence.

Source excerpt / validation note

Walnut Creek special inspection form is verified; countywide Contra Costa special-inspection packet requires a deeper future pass.

Implementation mapping

Artifact class	Official-source reference / packet component
App binding	Jurisdiction-aware forms library entry + packet rule + revision monitor
MVP use	Reference in document vault and expose link in admin UI
Later upgrade	Mirror original bytes or fetch through controlled crawler when infrastructure allows

Packaging transparency: this local PDF is a clean, downloadable official-source reference sheet built from a verified public source URL and current source content. It is not represented as a byte-for-byte mirror of the remote original unless that exact original file was directly mirrored into the runtime.

Inspection.OS Bay Area Next Pass Review

Follow-on pass to the prior official-forms binder. This pass focuses on two placeholder replacements, one prior inferred-link hardening, and the conversion of county-index logic into app-native schema tables for MVP planning.

What changed

• Contra Costa County no longer depends on a county-vs-city coverage note as its only county-level special-inspections placeholder. It now has a direct county program reference and a direct county recognized-agencies list.

• Marin County no longer depends solely on a city-county gap note. It now has a direct county permit-submittal checklist that requires structural drawings to list structural observations and special inspections.

• Permit Sonoma CNI-043 CALGreen Special Inspector Project Verification Form is now treated as verified-direct rather than inferred-direct.

• The county index has been rolled into app-native tables so the next implementation step can seed runtime rules instead of remaining document-centric.

Transparency model retained

This pass strengthens county coverage without pretending every county publishes the same kind of packet cover form. Where a jurisdiction exposes only a trigger source or an agencies list, the schema now records that distinction explicitly via verification_status and packet_role.

County delta snapshot

County	Previous weak spot	Current stronger source
Contra Costa	Coverage note only	Inspections page special-inspections section + recognized-agencies PDF
Marin	Coverage note only	County building-permit submittal checklist structural-plan requirement
Sonoma	CNI-043 carried as inferred direct URL	Direct resolvable official PDF

Build implications

• Special-inspection packet generation should now read a mix of cover-form records, agencies-list records, process-note records, and program-trigger records.

• The admin UI should expose verification status so internal users can see when a county rule is backed by a direct cover form versus a county-level requirement page.

• Do not block the entire MVP on full county parity. The stronger approach is to ship a clear verification model and a controlled rule table, then keep upgrading county coverage in scheduled crawler passes.

Inspection.OS Bay Area Official Forms Index v2

Next-pass county index with two placeholder replacements completed, one previously inferred Sonoma item hardened, and schema-rollup readiness notes added.

County	Special-inspection anchor set after this pass	Trade scheduling anchor set	Current verification note
Alameda	Oakland process + Oakland recognized agencies	Alameda county requirements + Oakland scheduling guides	County/city coverage already direct in prior pass
Contra Costa	Contra Costa inspections page + Contra Costa recognized agencies list + Walnut Creek packet	Contra Costa scheduling page + codes list + Walnut Creek request page	County trigger and recognition control now direct; countywide cover form still not surfaced
Marin	Marin building-permit submittal checklist + San Rafael form	Marin schedule/instructions + Marin instructions PDF + San Rafael code card	County trigger now direct; standalone county cover form still not surfaced
Napa	Napa County packet + City of Napa packet	Napa scheduling guides	Direct
San Francisco	DBI process + form + COI attestation rule	DBI scheduling page	Direct
San Mateo	County form + county agencies list + program page	No county trade scheduling PDF carried in this pack	Direct for special inspections only
Santa Clara	County short/long forms + San José existing/new forms + recognized agencies page	County InSite guide + San José scheduling page	Direct
Solano	County agreement + county documents page	County building documents / inspection workflow	Direct for county agreement; trade side still page-led
Sonoma	CNI-033R + CNI-033A + CNI-043 CALGreen verification	Permit Sonoma inspection codes/scheduling	CNI-043 hardened from inferred URL to direct resolvable PDF in this pass

Delta log

Change	Before	After this pass	MVP impact
Contra Costa placeholder	Coverage note only	County special-inspections page + county recognized-agencies list	County rule can now be seeded as verified requirement + verified recognition control
Marin placeholder	Coverage note only	County building-permit submittal checklist requiring structural drawings to list special inspections	County packet trigger can now be seeded even though no standalone county cover form was surfaced
Sonoma CNI-043	Resolvable by inferred URL pattern only	Direct resolvable official PDF verified	Verification status can be upgraded from inferred-direct to verified-direct

Form-record seed additions for this pass

form_record_key	jurisdiction	workflow_stage	verification_status	source_type
contra_special_inspections_page	Contra Costa County	Program overview / trigger	verified-direct	official webpage
contra_recognized_agencies	Contra Costa County	COI / recognition control	verified-direct	official PDF
marin_building_permit_submittal_checklist	Marin County	Pre-permit trigger	verified-direct	official PDF
sonoma_cni043_calgreen_verification	Sonoma County	Closeout / verification	verified-direct	official PDF

Inspection.OS MVP App-Native Schema Tables

This pass converts the county-index logic into normalized, implementation-shaped tables. The goal is to preserve jurisdictional fidelity while moving away from document-only reasoning.

Normalization principles

• Keep official source records separate from packet rules. A county may expose a program page, an agencies list, and one or more cover forms; those are different record types and should not be collapsed into one blob.

• Keep workflow stages stable across jurisdictions, but bind packet requirements by jurisdiction and inspection type.

• Represent ambiguous or partial verification explicitly with status values rather than omitting records or silently assuming equivalence.

Core tables

Table	Key columns	Purpose	Notes
jurisdiction	jurisdiction_id, county_group, name, level, parent_jurisdiction_id	County/city/regional/statewide registry	Allows San José under Santa Clara County, Oakland under Alameda, etc.
agency	agency_id, jurisdiction_id, name, program_owner_flag	Authority that publishes or enforces the source	Keeps county vs city vs regional roles distinct
regulatory_program	program_id, code, name, scope_level	SWPPP, Special Inspections, Dust Control, Asbestos, HazMat, Trade Inspections	Used by both document vault and packet rules
inspection_type	inspection_type_id, program_id, code, name	Stable field workflow type	Examples: swppp_pre_qpe, special_inspection_weekly, dust_daily, trade_building_request
workflow_stage	workflow_stage_id, program_id, code, ordinal, name	Lifecycle stage registry	Examples: pre_permit_packet, recognition_control, scheduling, closeout
source_record	source_record_id, agency_id, title, source_url, source_type, fingerprint_hash, verification_status	Controlled official source library	Stores direct PDF, webpage, inferred-direct, or gap-note status
form_record	form_record_id, source_record_id, local_file_name, packet_role, form_kind	Implementation-facing form or reference asset	Packet roles: cover, agencies_list, process_note, scheduling_note, closeout_form
jurisdiction_packet_rule	rule_id, jurisdiction_id, inspection_type_id, workflow_stage_id, required_flag, rule_expression	What is required where	This is the table the mobile/web clients read at runtime
document_vault_slot	slot_id, jurisdiction_id, program_id, slot_code, required_stage, source_record_id	Required document placeholders	Examples: prd_attachment_set, eauthorization_scan, sf_dcp_approval
task_cadence_rule	task_rule_id, jurisdiction_id, inspection_type_id, cadence_code, trigger_rule	Recurring task generation	Weekly special reports, annual reporting, rain-event checks, NOT closeout

Verification status model

verification_status	Meaning	Allowed behavior
verified-direct	Direct official source captured and URL verified	Use normally in packet builder and admin library
verified-indirect	Official county/city source verified but not a dedicated packet cover form	Use as trigger/control source; do not label as standalone cover form
inferred-direct	Likely direct file URL derived from official forms system but not yet re-verified	Show caution badge and schedule recrawl
gap-note	Placeholder used to avoid silent assumptions	Keep only until a stronger source is found

Seed rows created or upgraded in this pass

source_record.title	verification_status	packet_role	rule expression / use
Contra Costa County Inspections — Special Inspections section	verified-direct	program_overview	requires_special_inspection_when(plan_flag = true)
Contra Costa Recognized Special Inspection and Testing Agencies	verified-direct	agencies_list	approved_agency_check_required = true
Marin County Building Permit Submittal Checklist	verified-indirect	permit_trigger	requires_special_inspection_packet_when(structural_drawings_required = true AND special_inspections_listed)
Permit Sonoma CNI-043 CALGreen Special Inspector Project Verification Form	verified-direct	closeout_form	required_when(calgreen_special_inspector = true)

Runtime-facing packet rules (examples)

jurisdiction	inspection_type	workflow_stage	required assets
Contra Costa County	special_inspections	pre_permit_packet	recognized_agencies_list (required), city_or_project_specific_cover_form (project-specific), county special-inspections program note (required)
Marin County	special_inspections	pre_permit_trigger	building_permit_submittal_checklist trigger, project-specific special-inspection listing on structural drawings, city form when city jurisdiction applies
San Francisco	special_inspections	pre_permit_packet	DBI special inspection and structural observation form, DBI process PDF, COI attestation rule
Santa Clara County	special_inspections	pre_permit_packet	short or long county form depending project path; San José existing/new form when city jurisdiction applies

Recommended next migration step

Build three seed loaders: (1) jurisdictions and agencies, (2) source records and form records from the PDF library, and (3) jurisdiction_packet_rule rows keyed by inspection_type and workflow_stage. That produces a clean admin library, packet builder, and field runner without hardcoding county forks into UI code.

Inspection.OS Official Source Reference Sheet

Marin County Building Permit Submittal Checklist — Special Inspection Trigger

Direct county-level replacement for the prior Marin coverage-gap note. This sheet does not claim a standalone Marin County special-inspection statement form was verified. It documents the stronger, directly verified county source now available for packet logic.

Local file	[COUNTY-Marin]_Building-Permit-Submittal-Checklist_Special-Inspection-Trigger.pdf
Jurisdiction	Marin County
County group	Marin County
Agency	Marin County Community Development Agency / Building and Safety
Program	Special inspections / permit intake
Inspection type	CBC Chapter 17 special inspections
Workflow stage	Pre-permit packet trigger
Trigger / use condition	Structural plan submittal for projects requiring structural drawings and calculations
Source type	Official county PDF
Source URL	https://assets.marincounty.gov/marincounty-prod/public/2024-12/submittal-requirements-checklist-v12-20-24.pdf
Status / packaging note	Replaces the prior Marin city/county gap note with a direct county permit-submittal source. The county checklist is not a dedicated special-inspection cover form, but it is explicit enough to support county-level packet logic.

Operational highlights

• The county checklist states that structural drawings must **list structural observations and special inspections**. That gives Inspection.OS a direct county rule for pre-permit packet requirements.

• This source is stronger than the old placeholder because it is county-issued and directly tied to building-permit application review.

• A standalone county statement/agreement form still was not surfaced in this pass, so the correct representation is: **county special-inspection trigger verified, county special-inspection cover form not yet verified**.

Implementation mapping

Artifact class	App binding	MVP use
Official-source reference / packet trigger	Create a jurisdiction_packet_rule for Marin County special inspections with requirement_type = trigger and evidence_source = county checklist	Use this to block packet completion until a project-specific special-inspection cover set is attached or marked N/A

Verified county text captured for build logic

Relevant county language from the checklist: “Structural Drawings — List structural observations and special inspections.” That language appears in the Structural Plans, Sections, and Calculations section of the county PDF and is the basis for this replacement sheet.

Inspection.OS Official Source Reference Sheet

Contra Costa County Special Inspections Program and Recognized Agencies

Direct county-level replacement for the prior Contra Costa coverage-gap note. This sheet consolidates the county inspections page and the county recognized-agencies list into a single packet anchor.

Local file	[COUNTY-Contra-Costa]_Special-Inspections-Program-and-Recognized-Agencies.pdf
Jurisdiction	Contra Costa County
Agency	Contra Costa County Building Inspection Services / Conservation & Development
Program	Special inspections
Inspection type	CBC Chapter 17 special inspections
Workflow stage	Program overview + recognition control
Trigger / use condition	Project plans indicating special inspections; agency-selection and recognition validation
Source page	https://www.contracosta.ca.gov/4777/Inspections
Recognized agencies PDF	https://www.contracosta.ca.gov/DocumentCenter/View/2216/RECOGNIZED-SPECIAL-INSPECTION-AND-TESTING-AGENCIES?bidId=
Status / packaging note	Replaces the prior county-vs-city coverage note. This pass verifies the county's special-inspections landing language and the county's recognized-agencies list. A countywide statement/cover form still has not been surfaced as a public PDF.

Operational highlights

• The county inspections page states that some project plans may require special inspection by recognized inspection and testing agencies, and that the applicant will be informed if special inspection is required.

• The county recognized-agencies PDF is effective **11/12/25–11/12/26** and explicitly notes that inclusion is conditional in some cases and that chief building officials may add or remove agencies.

• For MVP logic, Contra Costa should now be modeled as **county-level special-inspection requirement verified** and **county-level recognition-control source verified**, while the countywide packet cover form remains unresolved.

Implementation mapping

Artifact class	App binding	MVP use
Official-source reference / packet trigger	Use the inspections page as the requirement source and the recognized-agencies PDF as the jurisdictional recognition-control artifact	Bind a two-part county rule: packet_required_when_special_inspection_flag = true; approved_agency_check_required = true

Verified county text captured for build logic

County inspections page: "Some project plans may require Special Inspection by Recognized Inspection and Testing Agencies (PDF). If your project requires Special Inspection, you will be informed." Recognized-agencies PDF: "RECOGNIZED SPECIAL INSPECTION AND TESTING AGENCIES" and "EFFECTIVE 11/12/25 – 11/12/26."
